FOR IMMEDIATE RELEASE**POCKETOP WIRELESS PDA KEYBOARD NOW AVAILABLE AT OVER 300 DIXONS STORES ACROSS THE UK**

Following North American success, leading European retailer to carry 'must-have' wireless accessory

London – December 9, 2002 – Pocketop Computer Corporation, an innovative design company creating input solutions for the mobile handheld device market, is pleased to announce that the popular wireless Pocketop Keyboard is now available in the UK through Dixons. The Dixons chain is part of the Dixons Group plc, Europe's largest specialist retailer of consumer electronics. This agreement marks the expansion of the Pocketop Keyboard into the UK retail market, following success of the award-winning product in North America.

"We expect mobile devices to be very popular this Christmas so we're delighted to offer our customers this hot new accessory," said Stuart Carson, Marketing Director for Dixons. "The Pocketop Keyboard's sleek design and wireless capability will appeal to consumers who rely on their PDA."

"Dixons is going to be our key retail channel partner in the UK and this relationship is an important first step in solidifying our aggressive European plan," commented David Ferguson, Chief Marketing Officer at Pocketop. "Our strategy is to build a foundation first in the UK, allowing Pocketop to establish a regional presence and develop local partnerships and expertise to enter the European market. With Dixons' input we can focus more strategically on Europe's unique software driver and device compatibility requirements."

Flexible and Compatible

The Pocketop Keyboard is optimized for the Palm and compatible with most PDAs. It utilizes the infrared port available on most devices, enabling consumers to keep the same keyboard when they upgrade their PDA, as Pocketop makes all the required device driver software for all their compatible devices available for free download from their website. This cost-effective approach is generating significant interest from handheld computer users. The Pocketop Keyboard's simple one-fold design can be carried together with the PDA as one device, fitting easily in the same pocket. When folded, the keyboard is just slightly larger than the Palm m515 – when open, it offers touch-typing functionality. The Pocketop Keyboard was featured

recently at the Palm Pavilion at Comdex 2002. It is the only keyboard available for the new Palm Zire and offers a unique mouse feature for Palm OS device owners.

For More Information

The Pocketop Keyboard is available immediately at Dixons for £79.99 (inc VAT). To locate a store near you, visit the Dixons website at www.dixons.co.uk. For European online orders, the Pocketop Keyboard is available through Widget UK at www.widget.co.uk. For distribution opportunities in Europe, please contact Widget at +44-845-055-0005.
